Pacific Power

**GARY W. HOOGEVEEN**  
President and CEO  
Rocky Mountain Power

PacifiCorp, a regulated utility based in Portland, Ore., serves 1.9 million customers across 141,000 square miles in six western states. The company comprises two business units that generate and deliver safe, reliable electricity to customers at a reasonable price.

- Pacific Power serves customers in Oregon, Washington and California.
- Rocky Mountain Power serves customers in Utah, Wyoming and Idaho.
- With its large, diverse portfolio of generating assets, the company is one of the lowest-cost utilities in the U.S.
- PacifiCorp owns 46,000 acres of lands for wildlife habitat, forestry and recreation.

### RENEWABLE AND NONCARBON RESOURCES\*

- Wind, hydro and geothermal resources currently make up more than 30 percent of the company's owned generating capacity.
- To accelerate PacifiCorp's affordable and clean energy vision, the company will significantly expand the amount of wind power serving customers by 2020.

> CONTINUED ON BACK

- The company’s most recent Integrated Resource Plan includes 1,150 megawatts of new wind resources and 999 megawatts of upgraded or “repowered” wind resources to come on-line by the end of 2020.
- PacifiCorp plans to meet 88 percent of forecasted growth in energy use over the next 10 years through energy efficiency, reducing the need to build new power plants.
- The company’s participation in the Western Energy Imbalance Market has saved PacifiCorp customers more than \$100 million and reduced carbon emissions in the region by nearly 215,000 metric tons since 2015.

### ELECTRICAL FACILITIES

- The company operates 73 generating facilities across the West, including coal, natural gas, hydroelectric, wind, solar and geothermal facilities.
- PacifiCorp has approximately 64,000 miles of distribution lines and approximately 16,500 miles of transmission lines – more than any other single entity in the West.

### CUSTOMER SOLUTIONS

- Pacific Power and Rocky Mountain Power offer customers the opportunity to support even more renewable energy by participating in its nationally acclaimed Blue Sky<sup>SM</sup> renewable energy program. Blue Sky renewable energy is separate from, and in addition to, what the company buys or generates to serve all customers.
- Together with partners, the company is offering pilot programs and expanding charging infrastructure to accelerate the adoption of electric vehicles.

*\*All or some of the renewable energy attributes associated with wind, geothermal and qualifying hydro facilities may be used in future years to comply with renewable portfolio standards or other regulatory requirements or sold to third parties in the form of renewable energy credits or other environmental commodities.*
